

Kayak South Crete

Duration: 6 days Level: Intermediate to advanced Overnight: Wild camping Price: 890€

This is our best selling kayak expedition and there are several reasons for this but the major one is the outstanding landscape. A big part of the route is protected from the strong north winds by the massive of White mountains (48 summits above 2000 meters!) with plenty of remote beaches and of course sunshine!

Overview of the trip

[890€/person](#) [Book](#)

This six days expedition is suitable to new paddlers (2-3 years of experience) as well but you will need to be able to travel with 6-7km/hour to join the trip. Will be great to have experience in winds as part of the trip is exposed to katabatic winds. Will try to avoid them by doing proper timing/planning but occasionally that is not possible. If you are in doubt about your skills contact us and will let you know if you will be fine to join the expedition.

The villages/towns of Palaiochora, Sougia, Loutro, [Sfakia](#), [Agia Roumeli](#), Rodakino, Plakias, [Agia Galini](#) and Matala are just a few that we will pass during our trip. If we don't paddle a day or so due to bad weather there are plenty of hiking options including the famous Samaria gorge which in most cases we are able to hike all or part of it.

EXPERIENCE NEEDED

The whole expedition is about 135km.

Due to driving distance the 1st day we wont be able to paddle more than 10k and same for the last day.

That give us roughly 20km per day excluding those 2 days. Bad weather days will make it necessary to increase the daily kilometres up to 30 or more.
