

Kayak Sporades

Sporades Island hopping at its best! The Sporades is a group of Greek islands in the northwest Aegean sea. The longest crossing on the trip is more or less 12 km; you don't need to have experience in open crossings but you do need to be able to paddle 2-3 hours without landing.

EXPERIENCE NEEDED

The whole kayaking expedition is about 130-150km. This equates to about 25km/day in 6 days., however bad weather days will make it necessary to increase the daily kilometres up to 35 or more.

You should have a solid assisted rescue (any).
